1994 NORTH CAROLINA AGRICULTURAL STATISTICS

**Office of
THE COMMISSIONER OF AGRICULTURE
Raleigh, North Carolina**

Agriculture in North Carolina is important and bigger than ever! Every day we process over 1.5 million broilers, 170,000 turkeys, and 27,000 hogs. We continue to be the leading producer of tobacco, sweetpotatoes, turkeys, and are the second largest producer of cucumbers for pickles. But these are only a handful of commodities that make up the diversity of North Carolina agriculture. Last year North Carolina ranked third in net farm income with agriculture and agriculture related industries contributing \$42 billion to the State's economy and employing 21 percent of the work force.

Now that might sound like I am braggin' on North Carolina agriculture, but it's not braggin' when it is true. My life's work has centered around improving and promoting North Carolina agriculture. The extent of the industry from farmer to consumer is often overlooked because it runs so efficiently.

Pressures on agriculture have increased from all sides, but the Agriculture Department continues to meet the challenges and is providing new ways to promote and assist our industry. We have received funding to open a new farmers market in the Triad area, place a marketing specialist at the proposed Global Transport Park, increase Aquaculture development, establish a new livestock facility, and additional funding to support other new and ongoing programs. The new Goodness Grows in North Carolina Visa card will also provide funds to promote marketing of North Carolina products.

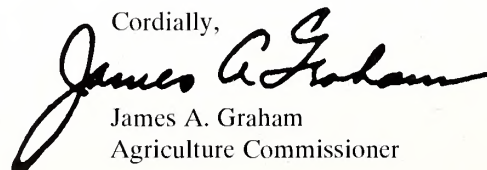

Another big breakthrough for North Carolina agriculture was the sale of 10,000 metric tons of pork carcasses, or about 264,000 hogs, to Russia. The sale will strengthen the expanding pork industry and proves that quality North Carolina pork is in demand, not only nationally, but also globally.

Also this year, I am proud to be a part of the first annual Mountain State Fair. The fair will highlight exhibits of all kinds of agricultural products from nursery items to culinary arts. The livestock shows and displays, exhibits of fruits and vegetables, canned goods and home economics projects highlight the quality agricultural commodities western North Carolina has to offer.

Standing with me at the fair's opening is Bob Murphy, State Statistician. Bob heads up the Agricultural Statistics Division that contacts growers for information relative to planted acreage, yields, livestock inventory, prices, etc. The official statistics in this book are provided to farmers and agribusinesses throughout the state to help keep them informed about agriculture. My thanks to all farmers, agribusinesses and commodity groups who contribute valuable time and information to make this publication possible. Only with your help can we keep everyone informed on the importance and magnitude of North Carolina agriculture, which continues to grow.

Best Wishes.

Cordially,

James A. Graham
Agriculture Commissioner

James A. Graham
Commissioner

North Carolina
Department of Agriculture
Agricultural Statistics Division

Robert M. Murphy
State Statistician

North Carolina agriculture (food, fiber, and forestry) is a dynamic industry that accounts for over 28 percent of the state's economy. Despite the challenges of the drought of 1993, the mounting pressures on tobacco growers, and ever increasing environmental concerns, agriculture continues to flourish. Expansion and diversification has helped the industry remain a major influence in the North Carolina economy.

The importance of reliable and consistent agricultural data cannot be overstated. The data in this and all previous bulletins enables the user to quickly spot the major trends in production, the increased diversification, and glimpse the financial picture of agriculture in North Carolina and the United States.

Progressive diversification increases the demand for new agricultural data series. To meet this demand the state legislature provided funding in 1994 to start data series for some specialty commodities that are important to the state's agriculture.

Without the voluntary cooperation of farmers, agribusinesses, and everyone involved with agriculture this publication would not be possible. Our entire staff expresses appreciation to North Carolina farmers and agribusinesses that continue to voluntarily report on the numerous surveys conducted each year.

In closing I give a special thanks to our extremely dedicated office staff and the never faltering dedication of our field and office enumerators for the many hours devoted to collection, summarization and publication of agricultural statistics.

Sincerely,

Bob Murphy
State Statistician

Special Note

Official crop and livestock estimates are subject to revision when additional information becomes available. One of these sources of data for possible revision is the 1992 U.S. Census of Agriculture which will be available in 1994. State and county level revisions, if necessary, for all agricultural estimates will be published in 1995.

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N.C. Department of Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture.

The North Carolina Agricultural Statistics Division publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the most important reports and the approximate dates of release is shown in the table below. Those reports marked with an (*) are issued separately. All others are included in the semi-monthly release entitled "Farm Report". There is a nominal charge for these reports, which are available by writing to:

State Statistician

¹ A farm is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.

NORTH CAROLINA EXPERIENCES HOTTEST JULY ON RECORD

January 5th set a record high temperature of 79°F at Wilmington. This was 3°F higher than the record set in 1880. A strong cold front moved into the state on the 24th, bringing showers and thunderstorms. Most locations reported wind gusts up to 30 mph on the 31st. Grandfather Mountain reported gusts near 120 mph.

February 7th brought some coastal flooding. A fast moving, upper atmosphere low pressure system brought light snow to the central and eastern part of the state on the 20th. Cape Hatteras dipped to 21°F, breaking the previous record of 23°F in 1885. Snow accumulation of more than 4 inches was reported in the southern Appalachian Mountains.

March came in as a lamb but was lion-like much of the month. Showers and thunderstorms dumped one to two inches of rain on the 3rd. High pressure packing arctic air moved over the state on the 14th and 15th setting a record low minimum reading of 4°F below zero at Canton on the 15th. On the 24th golfball-sized hail fell on isolated spots from Albemarle to Jacksonville. A tornado touched down near the Raleigh-Durham Airport on the 27th.

April 5th began with coastal flooding and an accumulation of 2 to 3 inches of snow in the northern mountains. The storm moved northeastward just off the Outer Banks on the 6th causing showers to linger over the eastern part of the state. On the 16th a cold front over the state resulted in isolated rainfalls which totaled more than one-inch. Damage from thunderstorm winds on the 26th was reported in Chatham County. Large hail fell in the eastern part of the state.

May 4th brought a cold front which moved east of the Appalachian Mountains causing flash flooding near Tryon and large hail near High Shoals. A high pressure center moved off the coast and continued on an eastward course on the 24th allowing isolated showers and thunderstorms to develop in the western fringes of the state. On the 29th damage from thunderstorm winds was reported at Hickory and west of Warsaw.

June 4th tornadoes touched down at four locations in the central part of the state and large hail fell at 10 other sites. A weak cold front pushed across the state on the 15th. On the 28th a stationary front dissipated over the state. A cold front pushed into the state on the 30th.

July recorded its hottest temperature and 8th driest conditions on record. On the 3rd and 4th high pressure began building over the state and maximum record temperatures of 100°F to 102°F were reported. A stationary front across the northeastern part of the state dissipated on the 1st and 2nd. Another front remained stationary in the eastern part of the state on the 25th and then dissipated on the 26th.

August 3rd and 4th brought widely scattered thunderstorms with isolated rainfall amounts of 1.75 inches at Asheville and 2.50 inches at Mills River. On the 31st, high pressure was centered over the southern Appalachians as Hurricane Emily brushed the Outer Banks turning northward during late afternoon and northeastward that evening. Cape Hatteras received 7.5 inches of rain but significant rainfall and hurricane force winds were confined to a small strip along the barrier island.

September began with a cold front which drifted southward through the region on the 4th and 5th causing heavy thunderstorms in the eastern part of the state where Fayetteville and Wilmington reported 3.43 inches and 2.62 inches of rain, respectively. On the 16th more than one-inch of rain fell at Fayetteville and Raleigh. New Bern reported more than one-inch of rain on the 26th.

October 7th brought heavy showers and thunderstorms which spread in the coastal part of the state. Cape Hatteras and Wilmington measured 2.94 and 1.48 inches of rain, respectively. On the 10th, Fayetteville reported 1.06 inches of rain. Scattered rain of one to three inches were reported over the eastern part of the state on the 25th-26th.

November 11th-12th re-established a strong high pressure center over the state. A low pressure system developed off the coast and moved northward on the 19th. Rainfall totals of 1.50 to 3.00 inches were reported over parts of the region west of the state on the 26th.

December 15th a low developed into a single center off the coast. Winds diminished over the region as the storm moved away from the mainland on the 16th. A developing low swept through the state on the night of the 20th resulting in 5 to 12 inches of snow from Asheville to Boone. Mount Mitchell reported 26 inches of snow.

Total Fertilizer Tonnage Dropped 5%

An extremely wet winter and spring followed by a hot dry summer played havoc with fertilizer and lime manufacturers, dealers and farmers from July 1992 - June 1993.

Wet conditions halted lime application in many fields resulting in a drastic decline (19%) in lime tonnage compared to last year. The wet conditions in the spring squeezed planting time into a very narrow time span making it difficult for fertilizer dealers to supply products and farmers to plant crops. Early indications of a significant decrease in fertilizer tonnage were eased by robust usage during May and June. Yearly tonnage for multi nutrient and single nutrient fertilizers increased slightly from 1992.

NORTH CAROLINA FERTILIZER TONNAGE SHIPPED

1992 = Tonnage shipments from July 1991 thru June 1992.
1993 = Tonnage shipments from July 1992 thru June 1993.

Total Tonnage July 1 Thru June 30

¹ Refers to acres reported as receiving one or more applications of a specific agricultural chemical. ² Insufficient reports to publish data for the following agricultural chemicals: Herbicides: 2,4-D, Simazine. Insecticides: Abamectin, Amitraz, Dicofol, Endosulfan, Esfenvalerate, Fenamiphos, Fenbutatin-oxide, Malathion, Methidathion, Methomyl, Oxamyl, Phosphamidon. Fungicides: Copper ammonium, Dinocap, Ferbam, Iprodione, Metiram, Triadimefon, Triforine. Other Chemicals: Ethephon, Gibberellic acid. ³ Insufficient reports to publish data for the following agricultural chemicals: Herbicides: Fluazifop-P-butyl, Glyphosate, Napropamide, Norflurazon, Oryzalin, Sethoxydim. Insecticides: Diazinon, Dicofol, Endosulfan, Fenamiphos, Malathion, Methoxychlor, Phosmet, Propargite. Fungicides: Copper oxychloride, sul., Copper sulfate, Ferbam, Oxytetracycline, Thiophanate-methyl, Triforine, Vinclozolin, Ziram. ⁴ Insufficient reports to publish data for the following agricultural chemicals: Herbicides: Napropamide, Oryzalin, Sethoxydim, Simazine, Terbacil. Insecticides: Endosulfan, Esfenvalerate. Fungicides: Sulfur. ⁵ Total applied is less than 50 pounds.

Restricted Use Pesticides

During 1992, the National Agricultural Statistics Service (NASS) surveyed growers of field crops and vegetables to obtain on-farm usage of all pesticides, both restricted and general use. Growers were personally interviewed to obtain information on chemical applications. All chemical applications were collected on a crop year basis.

The following chemicals are restricted use pesticides at the national level. There are additional chemicals which are considered restricted use pesticides in North Carolina.

CORN: Restricted Use Pesticide Applications, Major States, 1992 ¹

Agricultural Chemical	Area Applied ²	Applications	Rate per Application	Rate per Crop Year	Total Applied
	<i>Percent</i>	<i>Number</i>	<i>Pounds per Acre</i>		<i>Thousand Pounds</i>
Herbicides:					
Alachlor	27	1.0	2.02	2.06	40,129
Atrazine	69	1.1	1.05	1.12	54,939
Bromoxynil	8	1.0	0.25	0.25	1,389
Cyanazine	20	1.0	1.85	1.90	26,691
Paraquat	1	1.0	0.53	0.53	423
Insecticides:					
Bifenthrin	*	1.0	0.02	0.02	4
Carbofuran	2	1.0	0.95	0.97	1,648
Esfenvalerate	*	1.1	0.03	0.03	8
Fonofos	3	1.0	1.09	1.14	2,044
Methyl parathion	1	1.3	0.42	0.56	557
Permethrin	2	1.1	0.11	0.12	202
Phorate	1	1.0	1.04	1.05	990
Tefluthrin	2	1.0	0.11	0.11	187
Terbufos	8	1.0	1.08	1.09	6,309

* Applied on less than one percent of acres. ¹ Area planted in 1992 for the 17 major States was 71.4 million acres. States included are GA, IL, IN, IA, KS, KY, MI, MN, MO, NE, NC, OH, PA, SC, SD, TX, WI. ² Refers to acres receiving one or more applications of a specific agricultural chemical.

SOYBEANS: Restricted Use Pesticide Applications, Major States, 1992 ¹

Agricultural Chemical	Area Applied ²	Applications	Rate per Application	Rate per Crop Year	Total Applied
	<i>Percent</i>	<i>Number</i>	<i>Pounds per Acre</i>		<i>Thousand Pounds</i>
Herbicides:					
Alachlor	9	1.0	2.05	2.08	10,162
Paraquat	1	1.0	0.47	0.49	314
Insecticides:					
Methyl parathion	*	1.2	0.40	0.47	117
Permethrin	*	1.0	0.10	0.10	15

* Applied on less than one percent of acres. ¹ Area planted in 1992 for the 16 major States was 53.1 million acres. States included are AR, GA, IL, IN, IA, KS, KY, LA, MN, MS, MO, NE, NC, OH, SD, TN. ² Refers to acres receiving one or more applications of a specific agricultural chemical.

SNAP BEANS, FRESH: Restricted Use Pesticide Applications, Major States, 1992 ¹

Agricultural Chemical	Area Applied ²	Applications	Rate per Application	Rate per Crop Year	Total Applied

¹ Some counties not shown separately to avoid disclosing individual operations. ² Includes total income from farm and commercial forestry as estimated by County Extension Agents. The portion from commercial forestry is not included in cash farm receipts from farm marketings. ³ This estimate includes both commercial farm ponds and marine seafood. Trout and catfish income from commercial farm ponds was estimated by County Extension Agents. The income from seafood was based on dockside value of the commercial catch at the point of landing, as estimated by National Marine Fishery Service, U.S. Department of Commerce, Beaufort, N.C. District totals do not equal State total to avoid disclosing individual operations.

1993 North Carolina Crops Summary

Flue-Cured Tobacco Production Down

Flue-cured tobacco production in North Carolina totaled 587.9 million pounds in 1993, 1% less than 1992. The decline in production is attributed to a decrease in yield which was partially offset by an increase in acreage. Growers harvested 262,000 acres, 1,000 more than 1992. Yield per acre averaged 2,244 pounds, 23 pounds below 1992.

Value of the flue-cured crop totaled \$993 million, \$34 million less than the previous crop. This was the first time in three years that the value has not exceeded \$1 billion. Farmers received an average price of \$169.80 per cwt., \$3.70 below last year.

Burley Tobacco Production Up Slightly

Burley tobacco production in the State for 1993 at 18.3 million pounds, was up slightly from a year earlier. There were 9,000 acres harvested in 1993, down 2% from 1992. Growers averaged 2,035 pounds per acre, up 45 pounds per acre from the 1992 yield.

The 1993 crop was valued at \$32.6 million, up 1% from the previous year's value of \$32.2 million. The average market price received was \$177.90 per cwt. compared with \$175.90 per cwt. in 1992.

Peanut Production Lowest Since 1980

Peanut farmers harvested 300 million pounds in 1993, down 26% from the previous year. This is the lowest production since 1980 when 291 million pounds were produced. Yield per acre averaged 2,095 pounds on 143,000 acres compared to 2,660 pounds on 153,000 acres for 1992.

Value of production totaled \$91 million, down 28% from the 1992 value of \$126 million. The average market price for 1993 was 30.3 cents per pound, down .7 cents from 1992.

Corn Production Lowest Since 1954

The State's production of corn for grain in 1993 totaled 55.3 million bushels, 44% below the 1992 production of 98.8 million bushels and the lowest since 1954 when 49.1 million bushels were produced. Tar Heel farmers harvested 850,000 acres of corn in 1993, 190,000 acres less than were harvested in 1992. Average yield, at 65 bushels per acre, decreased 30 bushels from 1992.

The value of the crop totaled \$146 million, down 34% from a year earlier. The average price of \$2.65 per bushel was 39 cents above the previous year's price of \$2.26.

Sweetpotato Production Down

Sweetpotato production in 1993 totaled 4.16 million cwt., 1% below the 1992 crop of 4.20 million. Area harvested, at 32,000 acres, was 3,000 less than a year earlier. Yield per acre averaged 130 cwt., up 10 cwt. from 1992.

The value of the sweetpotato crop at \$42.8 million, was up 6% from the 1992 crop. Prices, at \$10.30 per cwt., were up \$.65 per cwt. from 1992.

Soybean Yields Decrease

North Carolina's 1993 soybean yield was 24 bushels per acre, down 3 bushels per acre from 1992. Overall production for the State was 28.8 million bushels, down 21% from 1992. Acres harvested, at 1.20 million acres, were 11% less than 1992.

The value of production was placed at \$185.8 million, 7% less than the 1992 value of \$199.7 million. The average market price for the year was \$6.45 per bushel compared with \$5.48 a year earlier.

Cotton Production Falls

The State's cotton growers produced 429,000 bales in 1993, 8% less than a year earlier. Acreage harvested was 385,000 acres, 2% above 1992. The average yield, at 535 pounds per acre, dropped 61 pounds below the 1992 average.

Value of cotton lint was \$119 million for 1993, 8% below the value of \$129 million set last year. Price per pound averaged 57.7 cents compared with 57.4 cents the previous season.

The value of cottonseed was down from \$15.7 million in 1992 to \$15.3 million in 1993. The average market price for 1993 rose from \$92.00 in 1992 to \$100.00 per ton.

Apple Production Higher

The 1993 apple crop in North Carolina totaled 300 million pounds, up 25% from 1992.

The crop's value was \$17.4 million, down 3% from 1992. Price per pound averaged 5.8 cents, compared to 7.5 cents in 1992 and the lowest since 1975.

Irish Potato Production Down

Irish potato production in the State totaled 3.23 million cwt. in 1993, 11% less than produced a year earlier. Area harvested, at 18,500 acres, was down 1% from 1992. Yield averaged 175 cwt. per acre, 18 cwt. below the previous season.

Value of production, at \$18.8 million, was 18% above 1992. Average price per cwt. was \$5.80, up \$1.45 from the 1992 average of \$4.35.

Wheat Production Declines

The 1993 wheat crop in North Carolina totaled 23.5 million bushels, down 15% from 1992. Area for harvest, at 560,000 acres, was up 1% from 1992. Yield per acre averaged 42 bushels, down 8 bushels per acre from the 1992 average.

Value of production totaled \$65.9 million, 27% less than the previous year. The marketing year average price was \$2.80 compared with \$3.25 in 1992.

1993 North Carolina Livestock Summary

Livestock, Dairy and Poultry Receipts Up

Cash receipts from all livestock, dairy, and poultry products rose 14% from 1992 to \$3.2 billion in 1993. Gains were recorded for all livestock items except milk. Cash receipts for all poultry products totaled \$1.8 billion, 13% above 1992. Broilers, at \$1 billion, accounted for 31% of the total livestock, dairy, and poultry cash receipts. Hog receipts, at \$922 million, accounted for 29% of the total and were up 27% from the previous year. Cash receipts from turkeys sold totaled \$519 million, 9% more than 1992. Milk cash receipts declined 3% from 1992 to \$209 million. Eggs produced during 1993 brought \$195 million, 8% above the previous year. Receipts from cattle and calves increased 1% from 1992 to \$195 million in 1993. Aquaculture rose 8% from 1992 to \$7.3 million because of the 10% increase in trout sales.

Broilers Surpass \$1 Billion

Income from the sale of broilers reached an all time high \$1 billion in 1993, 17% above 1992. A 10% increase in production along with 2 cents more per pound received was responsible for the increase. Production rose to 3.1 billion pounds, and the price received per pound totaled 32 cents. North Carolina held on to its #4 national ranking in broiler production with a total of 615 million birds. Broiler income contributes 31% of the livestock, dairy, and poultry and represents 18% of total farm cash receipts for the state.

Hog Numbers Jump

North Carolina pork production reached a record 2.1 billion pounds in 1993, 13% above last year's record. December 1, 1993 hog and pig inventory of 5.4 million was also a record high, 20% above the previous year. A crop of 8.9 million pigs was produced in the state during the year, another record high, and 17% above the 7.7 million in 1992. The average litter size rose to 8.60 pigs in 1993 compared to 8.51 pigs the previous year.

Hog marketings for the year increased 16% to 8.1 million head. The average price for hogs increased \$4.60 to \$46.30 per cwt. Increased marketings, coupled with the higher price received, caused a 27% gain in cash receipts to \$922 million for the state. The value of home consumption was unchanged at \$2.9 million.

Turkeys Record High

North Carolina retained the number one ranking in turkey production during 1993 with a record high total of 1,366 million pounds produced, up 3% from the 1,321 million pounds the previous year. The number of turkeys raised decreased 2% from 1992 to 61 million. Despite a 2% drop in the number of turkeys raised, an increase in the weight per bird and 2 cents more per pound received caused the healthy increase in value.

Milk Receipts Down

Cash receipts for sales of milk and cream produced in North Carolina decreased 3% from 1992 and totaled \$209 million. The value of milk produced was down 3% to \$214 million. Fluid milk prices were down 1% to \$14.40 per hundredweight in 1993. Milk production decreased 2% in 1993 to 1.49 billion pounds compared with 1.51 billion pounds in 1992. The average number of milk cows, at 94,000 head, was 3% less than the average in 1992. Output per cow in 1993 was 15,798 pounds, up 221 pounds.

Egg Receipts Expand

The value of egg production in North Carolina rose 8% in 1993 to \$195 million. Price per dozen increased 6% to 76 cents while the number of eggs produced increased 2% and totaled 3.1 billion. The state ranks ninth nationally in the value of egg production.

Cattle Inventory On Rise

Inventory of cattle and calves in North Carolina as of January 1, 1994 was 1.06 million head, up 3% from January 1, 1993. Cattle marketings decreased 4% to 230,000 head, and calf marketings increased 3% to 179,000 head. Calf births rose 2% and totaled 480,000 head.

Cash receipts from cattle and calves in the state totaled \$195 million, up 1% from 1992. The slight rise in cash receipts was due to 2% and 9% increases in cattle and calf prices respectively. The value of home consumption rose 2% in 1993 to \$10 million.

Sheep Cash Receipts Increase

North Carolina sheep and lamb cash receipts rose 46% in 1993, climbing to \$641,000. This large increase was due to an increase in pounds marketed and higher prices. Marketings, at 1.4 million pounds, rose 84% from 1992. Sheep prices rose \$4 per hundred to \$27 and lambs brought \$61 per hundred compared to \$58 in 1992.

Sheep and lamb inventory dropped to 16,300 head as of January 1, 1994, a 22% decrease from a year ago. The 1993 lamb crop fell to 15,000 head, a decrease of 10 percent.

Trout Sales Grow

Trout growers in North Carolina sold a total of 4.4 million pounds of trout (foodsize, stockers, and fingerlings) valued at \$5.8 million during the 12 month period beginning September 1, 1992 and ending August 31, 1993. Previous year sales totaled 4.1 million pounds valued at \$5.3 million. The number of commercial producers in 1993 was 71.

Catfish Sales Up

The 44 commercial catfish growers in North Carolina had sales of \$1.5 million in 1993, up 4% from the \$1.4 million the previous year. The water surface area used for catfish production on January 1, 1994 totaled 1,200 acres, 100 acres less than July 1, 1993.

TROUT

North Carolina's 71 commercial trout producers had sales of 4.4 million pounds valued at \$5.8 million for the period September 1, 1992 - August 31, 1993, and up 9% from the previous year. Sales of foodsize trout accounted for 96% of total sales, with stockers and fingerlings accounting for 4%. Total losses of trout for the year totaled 1.4 million pounds.

Trout growers in **15 selected States** had a total value of fish and egg sales of \$68.7 million during the 12-month period. This was an increase of 6% from the \$64.9 million in sales during the same period a year earlier. Growers sold a total of 58.5 million pounds of trout valued at \$62.8 million this year. Foodsize trout sales accounted for 93% of the total pounds sold. In addition, 465 million trout eggs were sold, valued at \$5.90 million, up 1% from the previous year.

CATFISH

The value of catfish sales in **North Carolina** totaled \$1.5 million during 1993, up 4% from 1992. North Carolina's 44 commercial catfish producers had sales of 2.07 million pounds, down 3% from last year. Sales of foodsize catfish accounted for 92% of total value, with stockers, fingerlings, and fries accounting for 8%. Ninety percent of the foodsize fish were sold to processors. On January 1, 1994, water surface acres growing catfish totaled 1,200 compared to 1,300 on July 1, 1993. Inventory of fingerling size and larger fish on hand January 1 totaled 7.7 million fish, up 35% from January 1, 1993.

Catfish growers in the **15 selected States** had sales of \$371 million during 1993. These sales were up 16% from the 1992 total sales of \$319 million. Sales of stockers totaled \$7.42 million, up 39% from the \$5.33 million during 1992. Sales of fingerlings and fry totaled \$8.75 million, down 12% from the \$9.88 million the previous year. Sales of foodsize fish totaled \$353 million, up 17% from last year's total of \$302 million. Direct sales to processors accounted for 93% of the total sales of foodsize fish.
